Suggestions:(Generative AI) 9th Novemeber 2025

1. How to identify AI-generated images.
2. Write a short note on supervised learning.
3. Explain briefly discriminative modeling.
4. Give the difference between Discriminative model and Generative AI.
5. Write a short note on unsupervised learning.
6. What is Generative AI?
7. Difference between Generative AI and Conventional AI.
8. What are the types of Generative AI and explain briefly.
9. Difference between Autoencoders (AEs) and Variational Autoencoders (VAEs).
10. Knowledge about the terms:

- Labeled Dataset
- Input Features
- Output Label
- Decision Boundary
- Generator
- Discriminator
- Latent Space
- Prompt
- Sequential Data
- Encoder/Decoder

11. Applications of Generative AI.
12. Advantages of Generative AI and its disadvantages.
13. Name some of the tools of Generative AI
14. What is Deepfake?
