suggestions :

1. Define Communication
2. Types of Communication with Advantages and Disadvantages
3. Difference Between Oral and Written Communication
4. Examples of Non-Verbal Communication
5. What is a Phrase?
6. What are Punctuation Marks?
7. What are Articles?
8. What is Capitalisation?
9. Closed-Ended Questions
10. Basic Elements of Communication
11. Factors Affecting Perspectives in Communication
12. Effective Ways of Communication
13. Paragraph and Rules
14. Types of Sentences
15. What is Encoding?
16. How Environment Affects Perspectives
17. Coherent Communication
18. Oral Communication
19. Sentences Using Question Marks
20. Indefinite Articles
21. Interjection and Conjunction
22. Two Types of Non-Verbal Communication
23. The 3 P's of Public Speaking
24. Adjectives
25. Apostrophe (')
26. Define Communication
27. Types of Communication with Advantages and Disadvantages
28. Difference Between Oral and Written Communication
29. Examples of Non-Verbal Communication
30. What is a Phrase?
31. What are Punctuation Marks?
32. What are Articles?
33. What is Capitalisation?
34. Closed-Ended Questions
35. Basic Elements of Communication
36. Factors Affecting Perspectives in Communication
37. Effective Ways of Communication
38. Paragraph and Rules
39. Types of Sentences

suggestions :

40. What is Encoding?
41. How Environment Affects Perspectives
42. Coherent Communication
43. Oral Communication
44. Sentences Using Question Marks
45. Indefinite Articles
46. Interjection and Conjunction
47. Two Types of Non-Verbal Communication
48. The 3 P's of Public Speaking
49. Adjectives
50. Apostrophe (')
51. What is Self-Management?
52. What is an Ability?
53. What is Self-Motivation? Give an Example.
54. What is Time Management?
55. Define Self-Confidence.
56. Importance of Positive Thinking (Any Four)
57. Steps for Building Self-Confidence
58. Two Ways to Improve Relationships
59. Steps to Identify Your Weakness
60. Any Three Self-Management Skills
61. What is Strength? How Does it Help? Examples
62. Physical Factors Influencing Personality
63. Qualities of a Self-Confident Person
64. Qualities of a Self-Confident Person
65. Two Tips to Build Self-Confidence
66. How to Keep Thinking Positive
67. Factors Affecting Self-Confidence
68. What is Self-Control? Give an Example.
69. What are Organizational Skills?
70. Lack of Self-Confidence Often Lands a Person in Unwanted Situations – Comment
71. Role of Experience in Building Self-Confidence
72. Note on Positive Affirmations
73. Four Positive Results of Self-Management
74. Steps to Identify Your Strengths
75. Importance of Knowing Yourself
76. How Social Factors Help Build Self-Confidence
77. Difference Between Low and High Self-Confidence

suggestions :

78. Personal Grooming – CARE, WASH, AVOID
79. Impacts of ICT in Personal Life
80. Two Impacts of ICT in Entertainment
81. Difference Between Data and Information
82. Use of a Scanner
83. What Does the Notification Area Contain?
84. Quick Launch Program Icons
85. Purpose of Double Click of a Mouse
86. Define the Internet
87. What is WWW Made Up Of?
88. Three Common Buttons in Navigation Bar
89. "Trash" Folder in Mailbox
90. Key Skills to Use ICT
91. Three Inputs of ICT in Personal Life
92. Two ICT Tools
93. Four Basic Operations of Computers
94. Parts of the CPU
95. Define OS with Examples
96. Difference Between UNIX and DOS
97. What is a Taskbar? What Does it Contain?
98. Features of Mobile Operating System
99. Advantages of Using Email
100. Main Objectives of Digital India
101. Define Blu-ray Disc
102. What is a Light Pen?
103. What are Laser Printers? Where Are They Used?
104. What Does the Motherboard Consist Of?
105. Full Forms
106. Unit that Controls Flow of Data from Input Device to Memory
107. Difference Between Email and Postal Mail
108. What are Protocols? Give Two Examples.
109. Difference Between a File and a Folder
110. Two Uses of ICT at Home
111. Two Types of Operating Systems
112. Components of ICT with Examples
113. Importance of Motherboard
114. IPO Cycle with Example
115. Difference Between Input and Output Devices
116. Difference Between Windows and Linux

suggestions :

117. Important Features of UNIX
118. Steps to Shut Down a Computer
119. Functions of an Operating System
120. Steps to Create an Email Account
121. Meaning of Digital India
122. Parts of an Email Address
123. What do you mean by “Promote the Business”?
124. Four Characteristics of Entrepreneurship
125. Hybrid Type of Business
126. Meaning of “Open to Trial and Error”
127. Difference Between Wage Employment and Entrepreneurship
128. Definition of Perception in Entrepreneurship
129. Three Important Elements of Entrepreneurship
130. Role of Entrepreneurship in Economic Development
131. Meaning of Trading
132. Three Benefits of Entrepreneurship
133. Who is a businessman? Give examples.
134. What do you mean by “Feedback in the Long Run”?
135. Why is patience crucial for an entrepreneur?
136. Differentiate between entrepreneurship and an enterprise.
137. What do you understand by the term wage employment?
138. What do you think is the biggest challenge of an entrepreneur?
139. What is the market status of an entrepreneur?
140. Low-investment service ideas
141. Key differences between product-based and service-based businesses
142. Definition of organisation in entrepreneurship
143. Meaning of manufacturing and trading-based businesses
144. Steps of starting a business
145. Process of Entrepreneurship Development
146. What is entrepreneurship?
147. Any four qualities of an entrepreneur
148. Difference between an entrepreneur and a businessman
149. Role of an entrepreneur in social development
150. Reasons for Soil Loss and Loss of Fertility
151. Why is Excess Salt Not Good for Soil?
152. Four Alternate Sources of Energy
153. Clear Cutting Method in Controlled Deforestation
154. UNEP Definition of Green Economy

suggestions :

155. Sources of Pollution
156. Three Actions to Conserve Energy
157. Three Components of the Green Economy
158. Green Skills Development Programme
159. Green Jobs (Definition with Example)
160. Two Types of Environment
161. Main Causes of Global Warming
162. Environmental Damage Due to Mining
163. Three Characteristics of the Green Economy
164. Two Reasons for Adapting the Green Economy
165. Green Projects in India (Definition with Examples)
166. Four Environmental Benefits of the Green Economy
167. Four Advantages of Getting Green Jobs
168. How can we protect our stream banks from soil erosion?
169. Name any two greenhouse gases.
170. What do you mean by Contour Ploughing?
171. What is Global Warming?
172. What do you mean by Renewable Resources? Give examples.
173. Give one important reason to launch the Green Skills Development Programme.
174. Give three areas where Green Skills are needed.
175. How can we help in saving the environment by using Green Transport?
176. What do you understand by the term Ecosystem?
177. List activities to prevent soil erosion in your locality.
178. List alternate sources of energy we should use to save our environment.
179. Describe any three methods of water conservation.
180. Factors Responsible for Environmental Imbalance
181. Ways to Conserve Food to Avoid Wastage
182. Use of the 5R's in Saving the Environment
183. Main Causes of Soil Pollution
184. Biotic and Abiotic Components of an Ecosystem
185. How Green Jobs Help in Saving the Environment
186. Green Project: Fourth Partner Energy
187. Three Social Benefits of the Green Economy
188. Definitions: Sanitary Management, No-Till Farming, Crop Rotation
189. Importance of Promoting Green Growth

suggestions :

190. What is INDIAai?
191. Reason for Big Companies Establishing AI Labs in India
192. Three Different Domains of AI
193. What is Natural Language Processing (NLP)?
194. Concept of Computer Vision
195. Define the Term Confusion Matrix
196. How AI Helps in the Agriculture Field
197. Evaluation Stage of the AI Project Cycle
198. What is the Black Box Problem?
199. Categories in Which AI Systems Are Classified
200. Why Data is Considered an Important Source of AI Bias
201. Ethical Concern of AI
202. Three World Famous AI Machines
203. Advantages of AI
204. Three Examples of AI Around Us
205. How Can a Machine Become Intelligent?
206. "The More the Data, the Better the Analysis" – Justification
207. Ethical Issue Related to Problem Selection
208. What is Data? Types of Data
209. Need for Visualizing Data
210. Application of AI in Healthcare
211. Issues and Concerns Related to AI
212. Application of Computer Vision in AI
213. Three Important Areas Where AI Has Made a Remarkable Impact
214. How AI Can Be the Future of Mankind
215. Concept of Data Statistics as a Domain of AI
216. Main Role of Creating a Confusion Matrix
217. What is a Leaf Node in a Decision Tree?
218. Concept of Data Acquisition
219. Differences Between Weak AI and Narrow AI
220. AI Research in Natural Language Understanding (NLU)
221. How AI Can Be Helpful in Space Exploration
222. How AI Can Lead to Unemployment
223. AI as a Boon for Repetitive Tasks
224. Difference Between Artificial General Intelligence (AGI) and Artificial Super Intelligence (ASI)
225. Three Important Careers in AI
226. Disadvantages of AI
227. Importance of Computer Vision in AI

suggestions :

228. Three Important Applications of AI in Real Life
229. AI/CF in Email Communication
230. Most Important Jobs at Risk Due to AI
231. Two Sources of AI Bias
232. Principles of AI Ethics
233. Difference Between Ethics and Morals
234. What is Prescriptive Learning?
235. What is Data Acquisition? Give an Example.
236. Sources of Data Acquisition
237. Independent Variables
238. Role of Tableau in Data Presentation
239. Importance of Choosing Appropriate Measurement Scale
240. Scenario: Identifying Needs Through Data Interpretation to Reduce Costs
241. Common Features of Bar Graph and Line Graph
242. Example: Record Keeping as Useful Data Collection Method
243. Impacts of Data Literacy in Education and Business
244. Ways to Become Data Literate
245. Steps Involved in Data Acquisition
246. Importance of Clear Structure in Data
247. Why Data Privacy is Important
248. Computer Vision and Type of Data Used
249. Data Pyramid
250. Why is Data Literacy Essential? List Two Factors
251. How Does Informed Decision-Making Benefit from Data Interpretation?
252. Difference Between Qualitative and Quantitative Data
253. Purpose of Data Processing
254. What is Kaggle and How Can It Be Useful for Data Enthusiasts?
255. Define the Term "Data Backup"
256. Why is the Data Literacy Framework an Iterative Process?
257. Two Best Practices to Ensure Data Privacy
258. What is Probability in Statistics?
259. How Do You Calculate Probability?
260. Define the Term “Statistics”
261. Use of Statistics in Disease Prediction
262. What is an Impossible Event? Provide an Example
263. Why is Calculus Important for AI Models?
264. Example of a Certain Event in Probability

suggestions :

265. Probability of Getting Two Heads When Five Coins are Tossed
266. Possible Ways to Express Probability
267. Areas of Application of Statistics
268. Use of Statistics in Upcoming Elections
269. How Probability is Helpful for a Student in Studying a Specific Topic
270. How Probability Helps in the Field of Medicine
271. How is Mathematics and AI Related? Explain in Short
272. What are Patterns? Explain with Examples
273. What is Meant by Equal Probability Events?
274. Role of "Collecting Data" in Statistics
275. Three Applications of Statistics in Real Life
276. Probability Example – 5 Dresses, 3 White Dresses
277. Examples of Statistics in Disaster Management
278. "Statistics is used for collecting, exploring, and analysing the data." Elaborate with Example
279. Three Uses of Statistics in Education
280. Concept of Probability – Example with Deck of 52 Cards
281. Terms Used in Probability with Examples
282. Role of Probability in Estimating Traffic on Roads
283. Identify Likely, Unlikely, Impossible, and Equal Probability Events
284. Two Examples of Impossible and Equal Probability Events
285. Define Certain Events and Likely Events with Examples
286. How Can You Tell if an Image is Real or AI?
287. Environmental Impacts of Generative AI
288. Important Features of Real Images Captured by Camera
289. Supervised Learning Model
290. Deepfake
291. Use of Generative Modelling
292. Random Noise Dataset
293. Generative AI
294. Difference Between Generative AI and Conventional AI
295. Variational Autoencoders (VAEs) with Examples
296. Discriminative Modelling vs. Generative Modelling
297. Limitations of Generative AI
298. Recurrent Neural Networks (RNNs) with Examples
299. Generative AI in Art with Examples
300. Three Benefits of Using Generative AI
301. Authenticity of Data from ChatGPT

suggestions :

302. Gemini vs. ChatGPT
303. Two Art Jobs Potentially Replaced by AI
304. Expand RNN and Two Applications
